PUBG comes as part of a slew of games with the same model: parachute to the island and fight to the death to make the last standing. The popularity of this game style has grown around the release of the book Hunger Games and film trilogy. Like the trilogy, PUBG players are flying on a plane over their island of choice, with the option of a parachute at any moment. This is where strategizing begins. Jump into town and instantly have access to many resources such as weapons, armor and medical items. However, landing in the city brings a higher density of people, increasing the likelihood that they will kill early. Sanhok is the smallest map of the four with a jungle theme where you can get virtually any part of the map from the plane, unlike the other three worlds. In a tight Sanhok neighborhood, you find yourself bumping into enemies faster than in other maps. Vikendi is the latest map edition and has a festive snowy theme. Choose a player avatar, enter the level of experience, level of graphics, add accessories and immerse yourself in the game. Once you touch in your map of choice, move from place to place looting as you go. Avoid giving your location away by taking a scene or attempted killing if you are not sure of your shot. Hold on as long as possible, removing other players on your way to victory. PUBG's addictive nature is growing as you gain more experience and success. Victory tastes extra sweet given how many players there are in each game. Even those with average video game competence have a chance of winning in PUBG. Focus on strategy and excellent team communication to get to the end. Graphics on PUBG for Android (and all mobile) are reduced for obvious reasons.
